

MainWindow::on\_positionCalibration  
Button\_pressed

SerialComms::connectToSerial

Errors::serialConnection  
Error

```
graph LR; A["MainWindow::on_positionCalibration  
Button_pressed"] --> C["Errors::serialConnection  
Error"]; B["SerialComms::connectToSerial"] --> C;
```

The diagram illustrates a flow where two different functions, 'MainWindow::on\_positionCalibration Button\_pressed' and 'SerialComms::connectToSerial', both trigger an 'Errors::serialConnection Error'. The functions are represented by white boxes with red borders, while the error is represented by a grey box with a black border. Blue arrows indicate the direction of the flow from the functions to the error.
