

MainWindow::on_actionEnumerate
_Ports_triggered

MainWindow::on_actionAttempt
_to_connect_triggered

Errors::serialNoEnumsFound

```
graph LR; A["MainWindow::on_actionEnumerate  
_Ports_triggered"] --> C["Errors::serialNoEnumsFound"]; B["MainWindow::on_actionAttempt  
_to_connect_triggered"] --> C;
```

The diagram illustrates a flow where two methods from the MainWindow class trigger a specific error message. The first method, on_actionEnumerate_Ports_triggered, and the second method, on_actionAttempt_to_connect_triggered, both have arrows pointing to the Errors::serialNoEnumsFound message box.
